

4B BRAIME Elevator Components to offer succession products for JACKSON Bolts

4B BRAIME have purchased the machinery and tooling to manufacture the range of elevator bucket bolts previously manufactured by **JACKSON / FLEXCO FASTENERS**.

This is good news for all those companies who have run into sourcing problems after Flexco's decision to stop manufacturing their range of JACKSON elevator bucket bolts.

In fact, at 4B telephone lines have been running hot in the last few weeks because of customers who were desperately searching for Jackson bolts.

The JACKSON machinery will enable 4B BRAIME to manufacture under their own "4B" brand the following former JACKSON bolts:

"Ref 70"; Large Oval Washers, Easifit Bolts, Fang Bolts and Euro Bolts.
